

BEV-SEAL ULTRA® 973 SERIES

python with our best tubes

THE FINEST IN PYTHON!

RECOMMENDED USE

The best beverage transfer python available. Can be used for all applications. Unsurpassed oxygen and flavour protection combined with flushability due to our Bev-Seal Ultra 235 Series tubes.

KEY FEATURES AND CHARACTERISTICS

- From the outside in:
 - Branded with product identification, certifications, and meter counter marks;
 - A black, yarn reinforced extruded jacket with slip agent to minimise friction;
 - 19mm thick firm tubular closed cell foam;
 - Plastic film holding all the tubes tightly together;
 - Aluminium foil further enhancing the insulating properties;
 - Our best dual barrier product tubes; Bev-Seal Ultra 235 Series with Glass-Flex™, coloured and individually numbered;
 - Cabled product and cooling tubes for straight unrolling;
- Allows change-overs from even the most pungent flavours with simple flushing procedures;
- Certified under standard NSF-51 for food equipment and NSF-61 for drinking water systems.
